

Hand Made Alpaca Duvets

Why choose an alpaca fleece duvet?

Types of Duvets	Absorbs Moisture	Chemical Free	Natural Fire Resistance	Dust Mite Free	Non Allergenic	Breathable	Environmentally Friendly
Synthetic Duvet	0%	No	No	No	No	No	No
Feather/Down Duvet	0%	No	No	No	No	Yes	No
Sheep's Wool Duvet	25-30%	No	Yes	Yes	No	Yes	No
Alpaca Duvet	30-35%	Yes	Yes	Yes	Yes	Yes	Yes

How do they compare?

An alpaca fleece duvet will absorb up to 35% of its weight in moisture, keeping you dry and comfortable while you sleep.

During the processing of our alpaca fleece duvets, no harmful chemicals are used. We use 100% natural, organically grown alpaca fleece. Down and feathers are treated with products to help them become allergy free and wool is sometimes treated with a thin film of polymer to prevent felting and shrinking.

Alpaca fleece bedding is the safest choice for people of all ages because of its natural moisture content. If burned, it merely smolders and will not melt and cling to the skin causing serious hot melt burns.

Alpaca fleece is free of lanolin and grease. It's porous, dry and clean nature prevents dust mites and other allergens from settling in. On the other hand, dust mites LOVE foam, polyester and down products. According to research dust mites have been found to be one of the most common causes of asthma and allergies in the bedroom.

Synthetic materials do not breathe, trapping moisture next to your body. Certain foams and synthetic materials can emit fumes as they age, affecting the quality of your sleep.

Alpaca fleece duvets are the most environmentally friendly product you can buy. We do not use pesticides on the alpacas. Alpaca fleece is harvested yearly from each animal, whereas down and feathers have been harvested at the end of the bird's life. Synthetic materials are petroleum based and oil production is toxic and highly energy consumptive. Willowlane duvets come in a 100% cotton bag for storage.

Why we use Alpaca fleece in our duvets!

Alpaca is warmer, stronger, lighter and cleaner than sheep's wool. We believe it is the best alternative for the health conscious consumer, providing you with a warm, comfortable, healthy environment for sleep.
